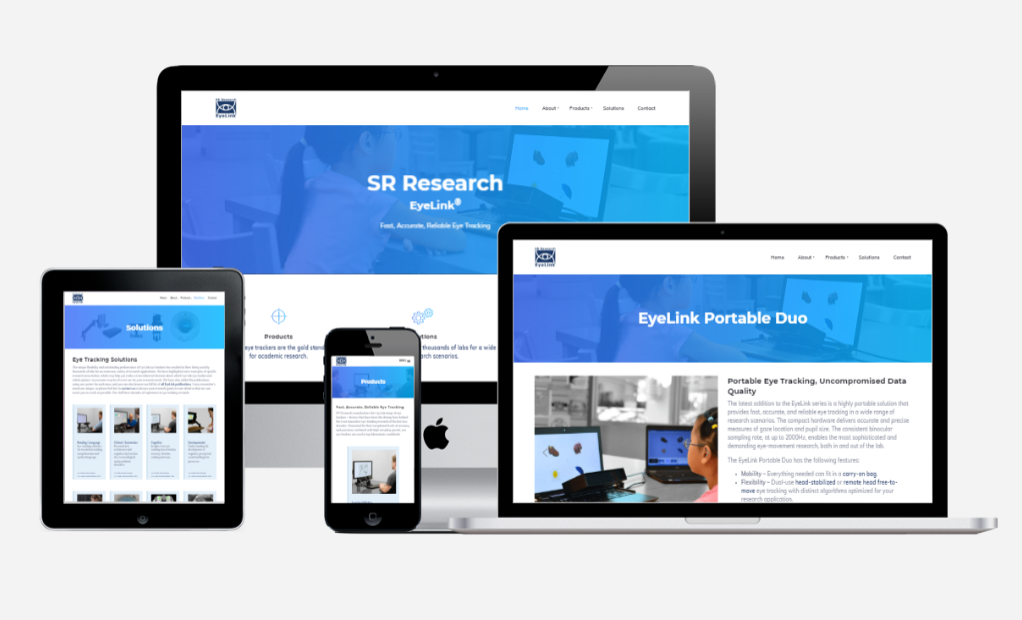
SR Research News

In our first newsletter of 2018, we introduce our new website and social media presence. We also list the conferences and workshops we'll be attending in the next few months and provide some links to the latest versions of all our software so that you can make sure your system is up to date and functioning optimally. As ever, if you would prefer not to receive this newsletter, you can unsubscribe at any time, and if you have any questions or feedback, please do not hesitate to contact us.

New Website

The SR Research website has a new look and now works nicely on tablets and mobile phones.



You can check out our products and accessories and explore the solutions page. The website also lists upcoming conferences, links to the support forum, newsletters, and much more. Take a look and let us know what you think.

Social Media

You can now follow us on social media - the perfect way to make sure you get the latest information on updates to our hardware, software, support services, conferences and other news.

Click the links above to sign up. You can tag us with #SRResearchLtd and #EyeLink on Twitter, like us on Facebook, etc.

Conferences and Workshops

This winter and spring, we will be busy exhibiting all over the world. We'll be in Germany for TeaP and the United States for the CUNY Sentence Processing Conference, Cognitive Neuroscience Society, and Vision Science Society meetings. If you're attending any of these events, drop by the booth and say hello!

Software Updates

To make sure you find out about all our latest software releases - Experiment Builder, Data Viewer and the Host Software - you can subscribe to the "What's new?" section on the support forum, or subscribe to the individual threads that contain the software you're interested in. Software upgrades are free and backward compatible, so you should always feel safe in upgrading to the latest versions, as they bring new features and other improvements. It is always recommended that you run the latest version of the Host software - we have recently released version 5.15 for the EyeLink 1000 Plus and 6.12 for the EyeLink Portable Duo. The most recent version of the Host software for the EyeLink 1000 is 4.594. Instructions for updating the Host software are also provided on the support forum - a simple process that does not take more than a few minutes.

Support

Our outstanding team of Research Support Specialists continues to expand, and with staff based in the UK and North America, we are always ready to help our users with their research. To ensure the fastest response possible for your support inquiries, use the support forum, send us an email, or give us a call:
