

SR Research *News*

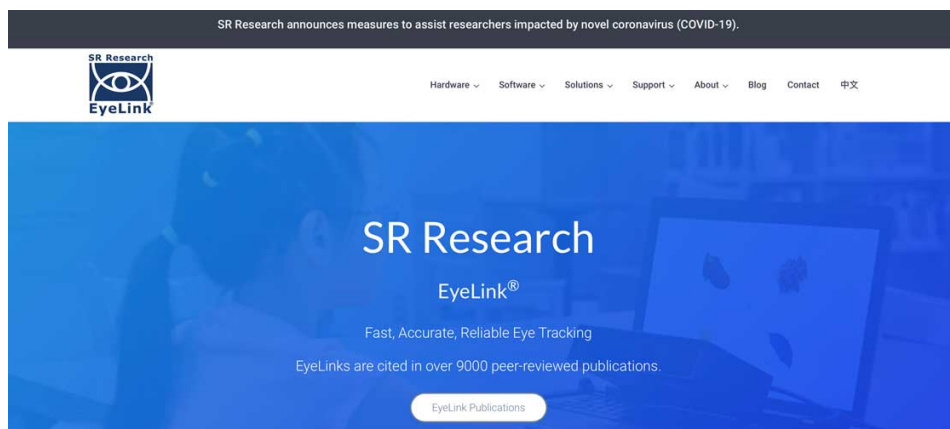

In the latest issue of SR Research News, we announce the release of version 2.1.1 of our EyeLink Display Software. We also highlight recent changes to our website, including our latest blog post. We end with conference updates and a reminder about our free temporary software license program.

EyeLink Display Software Update

The EyeLink Display Software (also known as the EyeLink DevKit / EyeLink Display API) enables other programming languages and stimulus presentation software to communicate with the EyeLink Host PC. The latest release, Version 2.1.1, is the result of a considerable effort on behalf of our programmers and support team. The new version is backward compatible and includes optimizations for recent versions of Windows, macOS, and Linux. New example templates are included for Psychtoolbox, E-Prime, Presentation, PsychoPy, OpenSesame, and more. The example templates are highly commented and illustrate a wide range of integration techniques, including implementing gaze-contingent tasks. We recommend that anyone using third-party stimulus presentation software [downloads and installs v2.1.1](#). New "[Getting Started Guides](#)" on the support forum provide detailed instructions for all supported stimulus presentation solutions.

New Look Website

We have updated our [website](#) with a new look and simplified navigation. You can now quickly access all of our [solutions pages](#), our [publications](#) page as well as our [useful apps](#) page from the main menu. We have reorganized and added new content such as videos to some pages, including the [EyeLink 1000 Plus](#) and [EyeLink Portable Duo](#) product pages. Also, lots of under the hood changes make the website faster and more responsive.

Perceiving Klimt - Blog Post

Our [latest blog post](#) highlights a research article by Anna Miscenà, Jozsef Arato, and Raphael Rosenberg from the University of Vienna. They used an EyeLink system to explore how people view Gustav Klimt's most famous paintings as compared to paintings in realistic and abstract styles from the same period.

Conferences

We attend a number of [conferences](#) each year. In the coming months, we will participate virtually at the [European Conference on Visual Perception](#) (August 22-27) and plan to have an online as well as a physical presence at the [Society for Neuroscience](#) (November 7-11, 13-16). Come by our booth (virtual or otherwise) and say "hi" or ask any questions you might have about our products or eye tracking in general.

COVID Licenses

We continue our program of offering software activation codes to assist researchers affected by the pandemic. The temporary licenses cover [Experiment Builder](#), [Data Viewer](#), and [WebLink](#). More information is available on our [website](#).

Contact

As always, if you have any questions, concerns, or feedback, feel free to [contact us](#). For support enquiries, please use any of the following options to receive the fastest response possible:
