

Coming Soon! The EyeLink 3: Head and Eye Tracking Combined

SR Research will soon be releasing our latest innovation, the [EyeLink 3](#) - a powerful, all-in-one head and eye tracker for screen-based research.

The EyeLink 3 provides both head and gaze movement data and much, much more:

- [Six-degrees of freedom \(6-DOF\) head-tracking data](#): X, Y, and Z position coordinates and pitch, yaw, and roll rotational angles
- Accurate and precise eye tracking data
- Head and eye data perfectly synchronized at up to 1000 Hz
- High frame rate (up to 500 FPS) eye video recordings

- [Novel pixel-based head and eye position data](#)
- Large trackable area
- Full integration with Experiment Builder and Data Viewer

Learn More about the EyeLink 3

See the EyeLink 3 in Action

We will be attending the following conferences in the coming weeks. Please drop by our booth to see the EyeLink 3 being demonstrated, and say Hi!

- [Society for Neuroscience \(SfN\) \(Booth 1104\)](#) (October 5-9)
- [The Psychonomic Society Annual Meeting](#) (November 21-24)
